

Working with the community

New England Renewable Energy Zone

October 2025

EnergyCo is delivering the New England Renewable Energy Zone (REZ) to provide a clean, affordable and reliable power supply for homes and businesses across NSW. We are committed to early and ongoing engagement with landowners, communities and stakeholders as we develop the REZ.

Overview

We have been engaging with local communities since June 2023 to inform the REZ network infrastructure project, including working with landowners to refine the study corridor and receiving feedback on the location of the project infrastructure. We will continue to work closely with landowners and the community to support the ongoing development of the network infrastructure project and the broader REZ.

Community engagement snapshot

Over 800 meetings with landowners, community members and key stakeholders

Several corridor refinements informed by community feedback

16 e-newsletters and 8 project updates delivered to letterboxes across the region

Engagement with local councils and MPs within the REZ network infrastructure project area

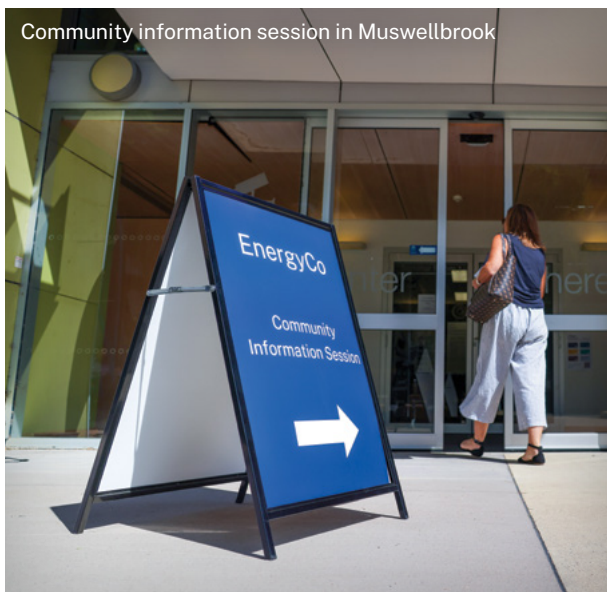

65 community information sessions and pop-up events

More than 1500 subscribers on the project email list

Community information session in Muswellbrook

EnergyCo pop-up at the Aberdeen Highland Games

Tools and resources

We have a range of supporting resources and tools available to help you better understand the REZ network infrastructure project and learn more about key topics.

Community information sessions and pop-up events

EnergyCo holds regular pop-up events and information stalls in the region to chat with the community and answer any questions about the New England REZ network infrastructure project. We also hold community information sessions at project milestones so the community can learn more about the project and speak with the team.

You can view the details of upcoming sessions and pop-up events on our website at energyco.nsw.gov.au/ne.

Community reference groups

We have established two community reference groups to provide an open forum of discussion between EnergyCo, the community and key stakeholders:

- The north community reference group represents communities within the REZ
- The south community reference group represents communities between the REZ and Bayswater Power Station in the south, near Muswellbrook.

Find information including a list of members and meeting materials on our website at energyco.nsw.gov.au/ne.

Fact sheets

We have published a variety of fact sheets on key project topics including generation projects, field investigations, delivering community benefits and more. You can view the fact sheets on our website at energyco.nsw.gov.au/ne.

Interactive map

Our interactive map shows key features of the New England REZ including the transmission study corridor, proposed energy hub locations, existing high voltage network and land boundaries.

The map is available to view online at energyco.nsw.gov.au/ne-rez-map.

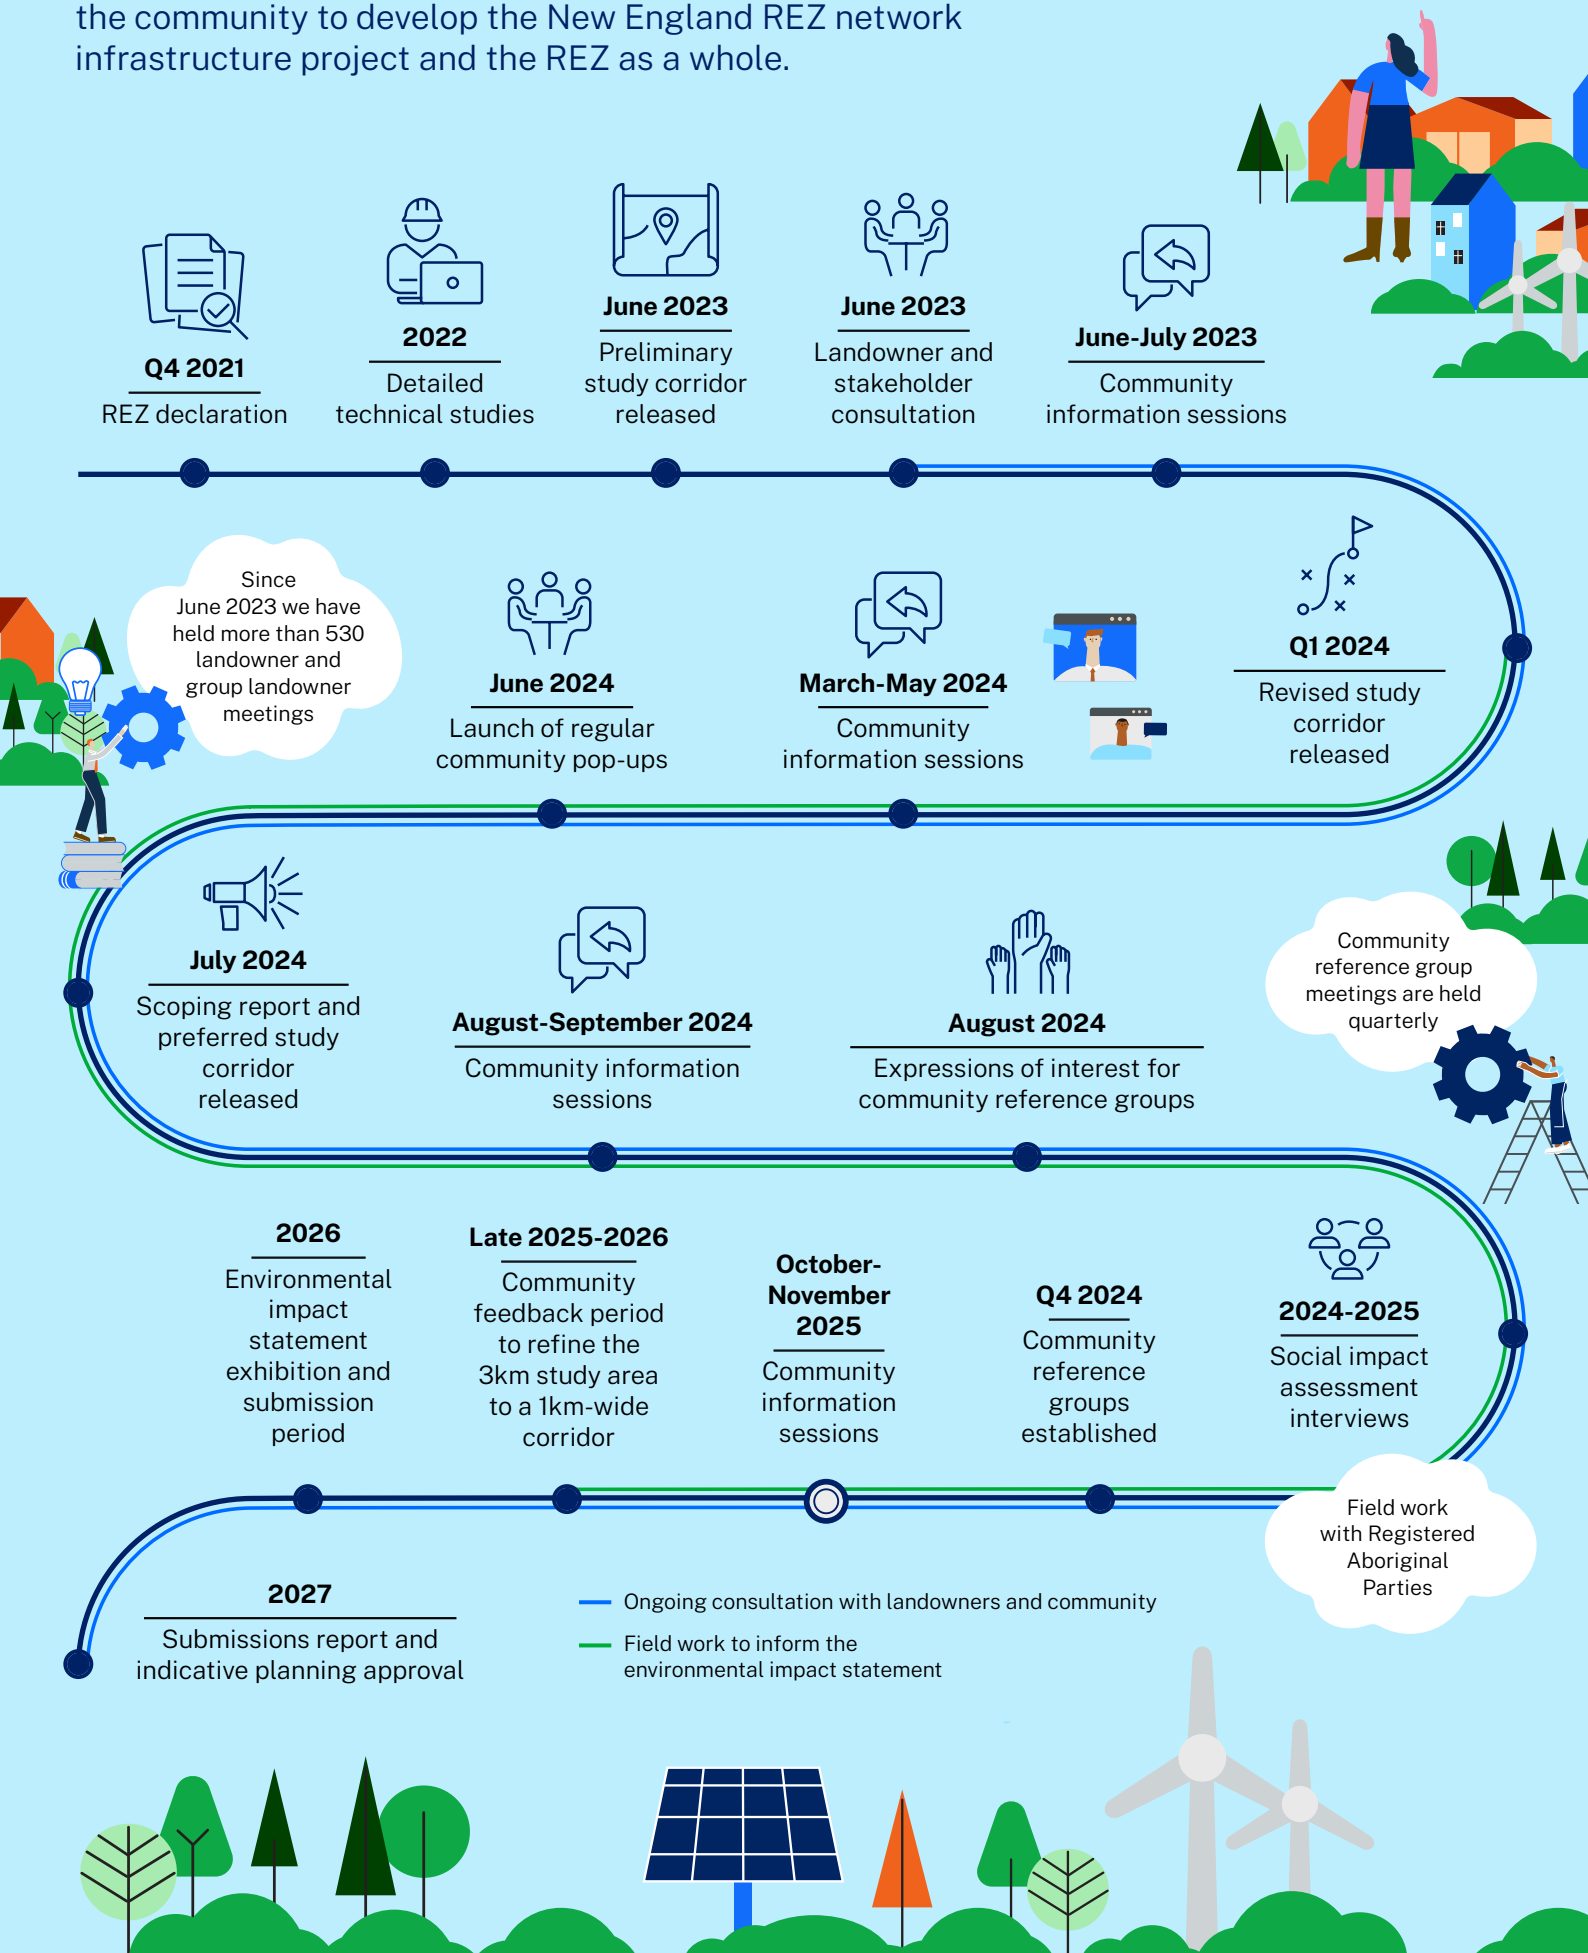

Scan the QR code to view the interactive map.

Community engagement milestones

We are continuing to work closely with landowners and the community to develop the New England REZ network infrastructure project and the REZ as a whole.

Keeping you informed

We are using a range of methods and activities to help ensure communities receive information about the New England REZ network infrastructure project.

We understand different communication methods suit different people, which is why we use multiple channels to engage with communities. These include:

Publishing project information and tools on EnergyCo's website including:

- fact sheets
- an interactive map
- reports
- frequently asked questions
- upcoming engagement events.

Project update newsletters and work notifications

Advertising in local and regional media outlets

E-newsletter to registered community members and stakeholders

Regular briefings with community groups and stakeholders

A dedicated phone number and email address to respond to enquiries

Media release for project milestones and announcements

Direct contact via regular meetings, emails and phone calls with affected landowners for the REZ network infrastructure project.

We encourage you to subscribe for email updates to ensure you receive our latest information and announcements. More information can be found on our website at energyco.nsw.gov.au/ne.

Community feedback

EnergyCo has received a range of community and stakeholder feedback and questions throughout the development of the REZ network infrastructure project. Below is a summary of key themes raised to date during our engagement with landowners and communities.

- **Project planning process** including how the transmission route has been developed and any alternative routes considered
- **Biodiversity** including impacts to known habitats of flora and fauna on private properties
- **Hazards and risk** including the management of livestock and wildlife around the project, biosecurity, bushfire and safety, health, and avoiding land contamination
- **Heritage** including Aboriginal cultural values and built or natural heritage items across the landscape
- **Economic matters** including business impacts and regional development opportunities such as employment and training
- **Land uses** and potential changes to operations due to the project
- **Water** including availability and water quality
- **Engagement** including feedback on how we engage with impacted landowners and suggestions on how we engage with the wider community
- **Access and transport** including accessing existing road infrastructure, private access roads or tracks
- **Amenity matters** including potential noise generation from the project and visual changes to the landscape
- **Cumulative impacts** from the project, future proposed projects and the REZ as a whole

The project's scoping report released in July 2024 provides a preliminary assessment of the key topics outlined above. To view the scoping report, you can find a link on our website energyco.nsw.gov.au/ne. These matters will be further considered and assessed as part of the project's environmental impact statement (EIS).

How community feedback is being considered

Route selection

Feedback from landowners, communities and key stakeholders has played a critical role in the route selection process to date, resulting in a number of changes and refinements to improve outcomes for landowners.

We started consulting with local communities in June 2023 with the release of a preliminary study corridor for the project. Since then, we have held ongoing discussions with landowners to better understand opportunities and constraints for the transmission corridor.

We will continue to work closely with landowners as we refine the corridor and develop the EIS through 2025 and 2026. We expect to lodge the EIS with the Department of Planning, Housing and Infrastructure (DPHI) for assessment and public exhibition in the second half of 2026. For more information on how we developed the study corridor, you can read our route selection fact sheet on our website at energyco.nsw.gov.au/ne.

First Nations

EnergyCo is working with First Nations representatives and key stakeholders to ensure local knowledge and places of significance are considered as we develop the project. This includes preparing an Aboriginal cultural heritage assessment for the EIS in consultation with registered Aboriginal participants.

Social impact assessment

We are preparing a social impact assessment as part of the EIS for the project. The social impact assessment aims to identify and evaluate potential social impacts from the project and how these will be managed. Social impact assessment engagement was carried out during 2024 and 2025.

We will be engaging with a range of stakeholders to inform the assessment. This will include interviews and surveys with landowners, interest groups and key stakeholders.

We will keep the community informed about opportunities to get involved in this work.

Delivering community benefits in the REZ

As the Infrastructure Planner, EnergyCo is coordinating the development of the New England REZ as a whole, including identifying opportunities for community benefits and strategies to minimise cumulative impacts in the region.

We understand local communities know what is best for their region, so we will be engaging key stakeholders in the project area to better understand priority areas to deliver benefits across the REZ.

We will keep the community informed as the project progresses and welcome ongoing feedback to inform our planning.

About EnergyCo

The Energy Corporation of NSW (EnergyCo) is a statutory authority responsible for leading the delivery of Renewable Energy Zones (REZs) as part of the NSW Government's Electricity Infrastructure Roadmap.

EnergyCo is working closely with communities, investors and industry to deliver the state's first five REZs.
