

# Field work from Muswellbrook to Armidale from February to June 2026

February 2026

EnergyCo is continuing investigations from Muswellbrook to Armidale, to inform our planning of the New England Renewable Energy Zone (REZ).

## Overview

EnergyCo is delivering the New England REZ to provide a clean, affordable and reliable power supply for energy consumers across NSW.

Delivery of the New England REZ involves building:

- renewable energy projects, such as solar farms, wind farms and battery energy storage systems
- transmission lines and energy hubs to connect these projects to electricity consumers.

## What are we doing?

To support and inform the planning and design of the New England REZ, a program of field investigations will be undertaken, including geotechnical investigations, surveys and site inspections.

This work will take place from Muswellbrook to Armidale, including Rouchel, Gundy, Pages Creek, Barry, Niangala, Walcha, Bendemeer and Uralla.

Most of these investigations will be carried out in publicly accessible areas, such as road reserves. **Where investigations need to be carried out on private property, we will consult with landowners directly to arrange access.**

Investigation work will take place from February to June 2026 and may include:

- visual inspections, topographic and cadastral surveys
- location and survey of utilities
- ecological surveys
- LiDAR (Light Detection and Ranging involves flying a plane approximately 1km above ground to create a 3D representation of the landscape)
- geotechnical and contamination investigations
- heritage inspections
- noise monitoring
- traffic counting
- flood modelling.

More information on these investigations and how they are undertaken can be found at [energyco.nsw.gov.au/ne](http://energyco.nsw.gov.au/ne), including our field investigations fact sheet.

## Work hours and timing

Work will generally take place between 7am and 6pm Monday to Friday, and 8am to 1pm on Saturdays.

Some work, such as traffic counting and fauna surveys, may take place outside standard hours to ensure we capture all relevant data. These activities are typically low impact.

## What will this mean for you?

### Work near public roads

You may see workers carrying out investigations in road reserves, but there will be minimal impact to road users.

Traffic counting cameras are used to count passing traffic only. The devices and field view are configured to monitor vehicle movements in the roadway. Facial recognition cannot be obtained from the cameras as they do not record to a high enough resolution.

To protect workers and road users, there may be times when we will have traffic control measures in place for short periods of time. Please keep to the speed limits and follow the direction of traffic controllers and signs.

For the latest traffic updates, you can download the Live Traffic NSW app, visit [livetraffic.com](http://livetraffic.com) or call 132 701.

### **Work on private property**

We will seek permission before accessing any private property for field investigations. We will work directly with landowners to comply

with any biosecurity measures or other special conditions of entry.

### **Managing our impacts**

We aim to manage our work to minimise impacts to the community and the environment. Noise from these activities is expected to be minimal. Access to properties will be maintained at all times.

### **Contact us**

For more information, you can get in touch with our team by calling **1800 061 114** (9am to 5pm, Monday to Friday) or by emailing [nerez@energyco.nsw.gov.au](mailto:nerez@energyco.nsw.gov.au).

You can read more about the New England REZ by visiting [energyco.nsw.gov.au/ne](http://energyco.nsw.gov.au/ne).

If you need help understanding this information, please contact the Translating and Interpreting Service on **131 450** and ask them to call us on **1800 061 114**.

### **Stay informed about our work**

We share information about our field work activities on our website, through local advertising and regular email updates to registered subscribers.

Visit our [website](#) or reach out to our team if you would like to register for email updates. You can unsubscribe at any time.

We welcome feedback on how we keep you informed about our work.
