

Hunter Transmission Project preliminary corridor

HTP preliminary corridor at a glance

Fastest way to deliver the HTP and maintain energy security

Avoids the Werakata National Park and Watagans National Park

Over 85% of the HTP will be on power station, mining and government land

Minimises the clearing of endangered valley floor vegetation and critical habitat

Avoids most of the Hunter community, including major towns and villages

Minimises the impacts of the HTP on scenic landscapes

Avoids the Pokolbin wine/tourist area and other strategic agricultural land

Significant scope to further reduce impacts on people and the environment
