

Port to Renewable Energy Zones construction update

Construction update

October 2025

EnergyCo is starting construction on the Port to Renewable Energy Zones road upgrade at the intersection of Industrial Drive, Selwyn Street, and George Street, Mayfield North.

We are delivering upgrades along the state roads network to enable the delivery of oversize over mass (OSOM) equipment needed to build renewable energy zones across NSW and leave improved roads for the whole community.

BMD Constructions will carry out the first stage of work at 19 locations between the Port of Newcastle and Elong Elong, unlocking access to the Central-West Orana Renewable Energy Zone.

What are we doing?

From the end April 2025 until mid-2026, we will be working at multiple locations along the Port to Renewable Energy Zones route.

Work has started at the intersection of Industrial Drive, Selwyn Street, and George Street, Mayfield North.

Work hours and timing

Standard daytime work hours are **7am and 6pm, Monday to Friday**, and **8am to 1pm, Saturdays**.

We need to install concrete barriers on the corner of **Industrial Drive and George Street**,

around the work area to ensure the safety of workers and motorists.

The barriers will be installed over **one night shift on Wednesday 22 October 2025, 6pm to 7am**, weather permitting. Any affected residents will be contacted directly.

What will this mean for you?

We will make every effort to minimise noise and vibration impacts by turning off equipment when not in use and monitoring noise.

During the works there will be traffic control, temporary lane closures and machinery operating adjacent to, or on the road. Access for road users will be maintained.

Please take care, keep to the signposted speed limits and follow the direction of traffic controllers. For the latest updates, visit www.livetraffic.com or call 132 701.

Thank you for your patience during this important work.

Location of the work

East Compound—Roll Shop Road, Mayfield North
